

Second Nordic Course in Virtual Dermatopathology 26-27 April 2018, in Reykjavik, Iceland.

Among this year's scientific faculty are experts in pediatric dermatopathology and skin tumors. Lecture topics include genodermatoses, malignant epithelial skin tumors, drug eruptions and connective tissue diseases.

The course is intended for trainees and specialists in dermatology, pathology and dermatopathology and the focus is on clinico-pathologic correlation using virtual (digital) slides.
