Dermatologists are in the first line of diagnosing and treating e.g. venous leg ulcers, atypical ulcers and ulcers with unknown etiology. At the EWMA 2019 Conference we have a number of sessions attracting dermatologists; such as sessions in atypical wounds, infected wounds and tissue regeneration. In addition, the patient perspective, multidisciplinary and economic issues within wound healing will be covered. The EWMA conference is also one of the best opportunities to network with clinicians, scientists and teachers in the world of wound healing.
